HAAG-STREIT UK
2019-2020 Catalogue
Haag-Streit UK

Haag-Streit UK designs, manufactures and sells a complete line of orthoptic, optometry and ophthalmic equipment and has distributorships for some leading brands, such as; Haag-Streit Diagnostics, Clement Clarke Ophthalmic, CenterVue, Ellex and Optovue.

Haag-Streit UK promotes the prevention, early detection, careful monitoring and effective treatment of retinal disease, glaucoma, corneal disorders, ocular motility and visual defects.

The organisation is dedicated to providing tailored solutions through the integration of information technology, leading brand ophthalmic instruments and unparalleled customer care. It focuses on the individual requirements of both the professional and the patient.

The company boasts a UK-wide network of Area Sales Managers and Service Engineers. This field-based team is supported by Product Managers and an internal Customer Service Team. Together they ensure that all Haag-Streit UK products are backed by the highest level of service and support.
Maintenance Contracts

Established for more than 25 years, our Service Division is committed to the critical area of maintenance and support. Constantly improving upon the levels of service and repair, our Service Division always strives to give you peace of mind.

HS-UK is a name you can trust, from the quality equipment that you purchase from us, through to the post-sales support you receive with one of our service contracts.

Why do I need a service contract?

At Haag-Streit UK we understand how important it is for your clinic or practice to run seamlessly, with no interruption to your service.

Whilst we are proud to say that our products are the gold-standard, service issues can still arise, which may lead to your equipment needing to be repaired by an expert.

With the demands on NHS and private hospital eye clinics and Opticians in the UK ever-increasing, and the need to limit equipment down-time, it is vital that you have a trusted service provider that you can call the minute you identify any performance issues. We understand that, as well as causing inconvenience to patients, equipment down-time can cost you both time and money.

Our HS-UK Service Team has the ability to respond rapidly to any diagnostic contract call-out and, no matter which contract you take, you will receive an annual service visit to ensure that your equipment is maintained at its optimum performance level.

Why HS-UK?

The Haag-Streit brand is synonymous with excellence. We aim to deliver this in all aspects of our organisation, from the gold-standard products we deliver, to the post-sales service and support we provide.

The majority of NHS hospitals with eye departments in the UK benefit from an HS-UK service contract, these include key eye hospitals such as; Moorfields, Manchester Royal Eye Hospital and Ninewells, Dundee.

Our proven maintenance programme and strong engineering experience, ensure that Haag-Streit UK can guarantee dependable technical support and the highest levels of customer service.

We offer three levels of service; Gold, Silver and Bronze. For further information or a written quotation, please telephone 01279 456314, email service@haag-streit-uk.com or visit www.haagstreituk.com/service.

Sight Testing & Refraction

Test types & accessories

Single Sided Test Types

A simple test type with an illuminated upper panel, which is interchangeable, with a spotlight in the lower panel. Available in direct or indirect format, with or without wall bracket. H:60cm W:21cm D:12cm

4107200  Free standing, direct
4107250  With wall bracket, indirect/reverse

Distance & Near Vision (DNV) Domiciliary Test Type

The distance test is designed for 3 metre testing. On the reverse of the unit is the near vision tests (35cm). Controlled by an infrared hand piece and light to carry, the DNV test type will fit into a standard briefcase.
Distance tests: duochrome, concentric circles, Snellen 3/60 to 3/5.
Near vision tests: Near fixation disparity, stereopsis test, suppression test, oblique tangent scale, bichromatic test, cross cyl and balance chart.
A comprehensive manual is provided.
4107201

Ophthalmic Mirror

Mirrors with optical glass qualities and distortion free.

4201001  Wall mirror — screws to wall. 54cm x 36cm
4202001  Wall bracket mirror — suitable for awkward shaped rooms. 54cm x 36cm
4203001  Floor standing mirror — Mounted on a strong, four legged floorstand. Column is adjustable for both height and angle. 54cm x 36cm

Test Types & Panels

Upper panels are available for use in the rotating drum test types and single-sided test types. The charts with dual purpose letters are for use at both 6 metres and 3 metres with a mirror.

A wide selection of test types is available in either plastic or cardboard. The cardboard charts are available flat or folding. The 3 metre test types will fit easily into a briefcase for domiciliary use.
Vision Tests

Cardiff Acuity Test

The test is available in two versions. The standard version covers a range of visual acuity levels from 6/48 and 6/96 to 6/3.75 and 6/7.5 (at working distances of 1m and 50 cm). The Low Vision version, aimed at practitioners working in the field of visual impairment, covers 6/96 and 6/192 to 6/7.5 and 6/15, at the same working distances. Designed specially to test ages twelve months to three years.

Cambridge Crowding Cards

For pre-school visual acuity testing. Developed at Cambridge University, this test is sensitive to the crowding effect which may impair vision when acuity for single letters is normal. It is simple to understand as all they have to identify is the central letter by pointing to a matching card. The letters used are the same as the Sheridan Gardiner test. The test consists of a nylon loop board, 6/60 crowded letter key card, single test, two spectacle frames, one with left eye occluded and one with right eye occluded. Carrying case included.

Lea Gratings Paddles

Lea Gratings Paddles are an easy to use tools for measuring grating acuity of preverbal children. This set consists of 4 paddles having 6 gratings plus solid grey surface. They are easy to clean and have printing on both sides. Supplied in a neat black wallet.

Kay School Screening Chart

The chart makes vision screening at school entry quick, easy, and reliable, without the child needing to know capital letters. Ask the child to read all the pictures in one vertical row and confirm their linear acuity at the smallest size with crowded pictures in the centre. The chart is double-sided to test each eye with different pictures and measures vision in nine LogMAR and Snellen sizes.

Ffooks Symbols Test Type

In a book format using a circle, square and triangle, often more convenient than cubes. There are eight pages of symbols ranging in size of 6/60 to 6/5. A near vision page is included. The test comes complete with three cut out symbols for use by the patient.

Kay Three Metre Crowded Book

A high quality printed and bound visual acuity picture book with matt-laminated pages. Contains 12 acuity sizes, 1.00 to -1.00 LogMAR (3/30 to 3/2.4 Snellen equivalent) with four pictures per page for quick accurate assessment of children’s vision. Designed for 3M testing, but can be used at alternative distances with a simple adjustment to the notation. Near test and matching card included.
Sonksen LogMAR Test

The SLT is a new visual acuity test. A unique feature of the test is that it is published with centile charts of acuity (similar to those used for growth) from 2 years 9 months, to 7 years 9 months - a period of very rapid changes in acuity.

Sheridan Gardiner Test

Designed for use with young children, testing depends upon matching shapes rather than letter identification. Suitable for the visual assessment of the deaf-mute, educationally sub-normal children and patients who do not share the same language as the tester. A series of orthoptic booklets in washable plastic form is available, which supplements the basic set.

1549011  Sheridan Gardiner test, comprehensive set (standard test, flip over booklets red, green, yellow and blue, 6m wall hanging test type)
4116001  Sheridan Gardiner test, standard (key card and flip over book, one letter per page) to be used at 6 metres
4116002  Sheridan Gardiner flip over booklet green (6/6 - 6/3)
4116003  Sheridan Gardiner flip over booklet red (6/60 - 6/18)
4116004  Sheridan Gardiner flip over booklet yellow (6/18 - 6/6)
4116005  Sheridan Gardiner flip over booklet blue (near vision)

LogMAR Charts

For 4 metre viewing. The arrangement of the letters on these revised charts is balanced so that the Sloan letters are represented at least once in every position. Can be used in an illuminated cabinet or as a wall hanging chart.

4302007  COHZV chart, for testing the right eye
4302008  ZRKDC chart, for testing the left eye
4302009  RNOVS chart, for refractions

Slimline Illuminated Cabinet

For use with LogMAR charts listed above. Available wall hanging or with a separate stand. Convenient storage for 5 charts at the back of cabinet. Dimensions: 70 x 66 x 6.5cm (27.5 x 26 x 2.5”). Chart not included.

4302002

Stand for Cabinet

For use with an illuminated cabinet. Includes castors, 2 locking. Allows for height adjustments from 114-125cm or 145-155cms for standing patients.

4302006
Near Vision Tests

Vocational Near Vision Test Type
Provided in a spiral bound format, the test is printed in conformity with the requirements of the Faculty of Ophthalmologists. The pages include text of N5, N6, N8, N10, N12, N14, N18, N24, N36, N48 corresponding to 5.6,8pt etc. Times Roman type face. A 1:17 reduced Snellen and Ridley type, music, typewritten copy, street map, stock market and soccer league table are included.
4117001

Kay Crowded Near Test Card
This test card accompanies the Crowded Book Set and contains the eight pictures in reduced sizes which are equivalent to 6/60 - 6/6 at a 33cm testing distance. The card is double sided and shows a different arrangement of pictures in both crowded and single format.
4116128

Maclure Test Type
An ideal test for young children, which is designed to differentiate between their ability to see and their ability to read. The test is based upon the Ladybird Keywords reading scheme using school script, which is a simplified type written without serifs. It helps the child to gradually appreciate the link between handwriting and print and to make the transition to the Times Roman serif style. (White cover).
4118001

Maclure Bar Reading Test
Using the same philosophy as the Maclure reading test type, this version is suitable for performing bar reading exercises. (Red cover).
7315001

Moorfields Bar Reading Book
Developed in accordance with suggestions from the Orthoptic Department at Moorfields Eye Hospital. The spiral bound format and seven pages of different graded texts makes the test most useful in cases of accommodative squint.
7314001

Thomas the Tank Engine Reading Test Type
Designed especially for young children. Conforms to the recommendations of the Faculty of Ophthalmologists.
1549017

Curpax Near Vision Test Type
Based on the recommendations of the Faculty of Ophthalmologists. Text is provided with the range N5 to N48 with a reduced Snellen test type, an industrial test, a stock market report, a telephone directory, a sheet music extract and a numeral test.
4117051
Jaeger Reading Test Type
A booklet viewed at 35cm with text from J1 to J20.
1549104

Laminated Test Type
A simple double sided reading test type ranging from N4 to N48 as approved by the Faculty of Ophthalmologists and incorporating their requirements. Being laminated, it is washable and durable.
1646012

Laminated Test Type
With modern text and computer screen presentation.
1646011

Occluders & Rules

Romanes Occluder
This simple all purpose occluder is a useful trial case accessory and may also be used for a simple assessment of visual acuity and the cover test. One side of the occluder bears a scale graduated in millimetres for interpupillary distance measurements and for numerical assessment of proptosis. The maker’s name and address is printed in Times Roman lettering and may be used as a near vision test.
4363001

Eustace Pinhole Occluder
A Lorgnette style occluder with five pinholes in one half. Reversible for use over either eye. Also incorporates pupillary distance rule and fixation point.
4364001

Spielmann Occluder
An opaque occluder on handle for cover testing. Being opaque, eye movements of the occluded eye can be monitored during the test.
1561010

Black/Green Silk Eyepatch
A simple washable, durable eyepatch with elasticated band, for use wherever patching may be required.
1710005

Opticlude Eye Patches
An adhesive eyepatch used whenever occlusion therapy is required. The virtually non-irritant adhesive leaves no residue on removal. Available for adults and children.
1771010 pack of 20 Opticlude occluders, junior
1771011 pack of 20 Opticlude occluders, adult
White Perimeter Occluder

Ideal for field testing. Its translucent properties ensure that the occluded eye does not dark adapt under test conditions.
5008004

Headspring Occluder

An effective accessory for use with visual field devices, screens and other tests where occlusion of one eye is required.
5203001

Kay Occluding Spectacles for Children

Test uniocular vision using the occluding glasses. The bright neon colours make them fun to wear and easy to remember.
4116130 Regular
4116134 Infant
4116143 Junior

Exophthalmometers

Luedde Exophthalmometer

A clear perspex bar about 1cm square x 10cm long is shaped with a notch at one end and is graduated in cm and mm for measurement of eye protrusion.
1561320

Mirror Exophthalmometers

These superior and inferior orbital rim based instruments measure the position of the globe accurately even after lateral orbitotomy, e.g. post tumour removal or thyroid decompression. Easy to use, fast reproducible results and comfortable for the patient.
1605020 according to Hertel
1605025 according to Naugle

Cross Cylinders

A useful confirmation test for examining astigmatism, comprising full aperture lenses with markings indicating the power and mounted on nickel silver knurled handles.

Available in the following powers;
4361002 ± 0.25 dioptre  4361004 ± 0.75 dioptre
4361003 ± 0.50 dioptre  4361005 ± 1.00 dioptre

Confirmation Tests

Glass lenses mounted in a metal frame available in the following powers; ±0.25, 0.50, 0.75 and 1.00 dioptre as 2 lens, 3 lens and 4 lens.
6221020 2 lens ±0.25  6221021 2 lens ±0.50
6221022 2 lens ±0.75  6221023 2 lens ±1.00
6221050 3 lens straight ±0.25  6221051 3 lens straight ±0.50
6221040 4 lens ±0.25  6221041 4 lens ±0.50
6221042 4 lens ±0.50  6221043 4 lens ±1.00
Retinoscopy Racks

Pair of Retinoscopy Racks

Ultra light-weight moulded lens racks made from high grade optical quality plastic. Sphere lens power range, ±0.5, 1, 1.5, 2, 2.5, 3, 3.5, 4, 5, 6, 7, 8, 9, 10, 12, 15 dioptres. To avoid scratching, the lenses are deeply embedded in the frame and are supplied in a soft plastic case.

1561030

Trial Cases & Frames

Trial Lens Set

Contains 218 reduced aperture lenses and 7 accessories, in case. International colour convention, metal rims (anodised aluminium). Cylinders do not have handles.

128 Spheres in 64 pairs:
Convex: 0.12, 0.25 — 4.00 in 0.25 dioptre steps, 4.00 — 6.00 in 0.50 dioptre steps, 6.00 — 14 in 1.00 dioptre steps, 14.00 — 20.00 in 2.00 dioptre steps
Concave: 0.12, 0.25 — 4.00 in 0.25 dioptre steps, 5.00, 5.50, 6.00 — 14.00 in 1.00 dioptre steps, 16.00, 18.00, 20.00

80 Cylinders in 40 pairs:
Convex: 0.12, 0.25 — 3.50 in 0.25 dioptre steps, 4.00, 5.00, 6.00
Concave: 0.25 — 3.50 in 0.25 dioptre steps, 4.00, 5.00, 6.00
10 Prisms 1/2, 1, 2, 3, 4, 5, 6, 7, 10, 12
7 Accessories: 1 Maddox Rod, 1 red glass, 1 green glass, 1 stenopaic slit, 1 pinhole disc, 2 blank discs

4304001

Full Aperture Trial Lens Set

169 lenses plus 9 accessories, complete in a wooden case.
Spheres in 30 pairs each plus and minus:
0.12, 0.25 — 4.00 in 0.25 dioptre steps, 4.50, 5.00, 5.50, 6.00, 7.00, 8.00, 9.00, 10.00, 11.00, 12.00, 13.00, 16.00
Cylinders in 10 pairs each plus and minus:
0.25, 0.50, 0.75, 1.00, 1.25, 1.50, 1.75, 2.00, 2.50, 3.00
Accessories: Coloured lenses: red, green, blue, brown and plano (2pcs), Slit plates: 0.50mm, 1.00mm, pinhole plates: 0.50mm, 1.00mm, 1.50mm, Occluder.

4302300

Perimeter Lens Set

A selection of quality full aperture lenses, complete in carrying case. Contains:
Spheres (1 each):
0.25, 0.50 — 3.00 in 0.25 dioptre steps, 3.50, 4.00, 4.50, 5.00, 5.50, 6.00, 6.50, 7.00, 8.00, 9.00, 10.00, 11.00, 12.00, 13.00, 14.00, 16.00
Cylinders (1 each):
0.25, 0.50, 0.75, 1.00, 1.50, 2.00, 2.50, 3.00, 3.50, 4.00, 4.50, 5.00
Sets available with + or - cylinders

4302400  + cylinders
4302410  - cylinders
Trial Frames

**Oculus Universal Trial Frame**

Constructed from lightweight metal alloy and high quality plastic. Accommodates up to five 38mm lenses for each eye. Independent screw adjustments for PD of 48 to 80mm. Screw operated bridge height and projection. Corneal distance scale. Sides adjustable for length and angle.

4505001

**Oculus Universal UB-4 Trial Frame**

As above, but made from robust, high-quality plastic.

4505100  Oculus Universal UB-4 Trial Frame
4505105  Polarising filters for Oculus UB-4 trial frame

**Oculus Half Eye Trial Frame**

Made from high-grade plastic and light metal alloy, this drop cell trial frame can accommodate up to three 38mm lenses for each eye. Adjustable PD of 59 to 67mm. Sides adjustable for length. Available with fixed bridge or adjustable nosepiece.

4506001  Half eye trial frame without nosepiece, adult
4506010  Half eye trial frame with nosepiece, adult

**Oculus Children’s Trial Frame**

As Half Eye Trial Frame with PD of 54 to 58mm. Also available with fixed bridge or adjustable nosepiece.

4506030  Half Eye Trial Frame without nosepiece, child
4506035  Half Eye Trial Frame with nosepiece, child

**Halberg Trial Clips**

Useful and effective monocular trial frame which may be used with almost all types of spectacle frames. Incorporates three cells for 38mm trial lenses and accessories. Ideal for low vision testing.

1549050  Halberg Trial Clips, pair
Colour Tests

Farnsworth Munsell 100 Hue Test
Is designed to detect colour vision anomalies and colour discrimination. Tests for inherited and acquired colour vision defects red-green and blue-yellow. Consisting of 4 separate trays with 85 coloured caps of subtle difference in hues, supplied in metal case.
1687024  Farnsworth Munsell 100 hue test complete with scoring software
1687022  Farnsworth Munsell 100 scoring software

Roth 28 Hue Test
An enlarged selection of colours (28) compared to the 15 of Farnsworth Dichotomous test. Used to detect and diagnose colour vision defects – inherited and acquired, red-green and blue-yellow.
4129060  Roth 28 Hue Test
4129061  Pad of 100 charts

L’Anthony’s Desaturated 15 Hue Test
A rapid diagnostic test requiring the patient to make a sequence of colours. Used for both inherited and acquired defects. A more sensitive test than 4129050, since colours are more desaturated (with less colour) so the task of ordering the colours is more difficult. The test will detect even very slight colour vision defects.
4129055  L’Anthony’s Desaturated 15 Hue Test
4129056  Pad of charts

Farnsworth D-15 Test
A modification of the Farnsworth 100 hue test, more suitable for screening purposes it is a dichotomous test looking at deuton, proton and tritan deficiencies.
1687025  Farnsworth D-15 Dichotomous test (saturated) in brushed steel case

Ishihara Colour Charts
A confusion test for colour deficiency, principally inherited defects of the red-green type. A very sensitive test, so will fail those with very minor defects. The tests provides little indication of occupational colour matching ability. It does not test blue/yellow vision.
Available as:
4129001  38 plate, used principally by ophthalmologists for complete satisfaction
4129002  24 plate, used mainly for occupational screening
4129003  14 plate, the most accurate plates from the complete 38 plate edition which allows minimum examination
4129004  10 plate, simple geometric shapes take the place of numerals for use with infants and unlettered people

City University Colour Vision Test, Edition 3
A rapid diagnostic test for detecting red/green and blue/yellow and classifying red/green (proton/deutan) and blue/yellow (tritan) defects (inherited and acquired). Enables an assessment of the degrees of any defect. Quick and simple to use and suitable also for children over five years. Different saturations provide varying degrees of sensitivity to detect even mild defects, if required. A good test indicating likely occupational suitability for colour tasks.
1549101  City University Colour Vision Test, Edition 3
1549107  Pack of charts for City University colour vision test, Edition 3

to order call customer services: 01279 883841 or visit us at www.haagstreituk.com/eshop
Child’s Colour Test Alpha

A confusion test with pictures to indicate the presence of inherited colour vision defects.
4129100

Stereotests

Lang Stereotests

Two strips act as random dot stereograms of varying separation of dots. Spectacles do not need to be worn to view. The test includes animal pictures viewed at 40cm. Simple shapes have to be detected. Pocket sized, the tests are available in three formats;

Lang I: Disparity Star 600”. Cat 400”. Car 550”
Lang II: Disparity Moon/Star 200”. Car 400”.
Elephant 600” monocular visible star
7307020 Lang stereotest No. 1 in wallet (car, cat and star shapes)
7307025 Lang stereotest No. 2 in wallet (elephant, van and moon with monocular star control)
7307030 Lang stereotest No. 1 & 2 in wallet

Frisby Stereotest

Three square transparent plates (6mm, 3mm, 1.5mm) have four similar patterns printed, three on one surface and one on the other, hence one appears in relief as closer or nearer. The patient indicates which square stands out in space from the others. Viewed at 40cm, glasses are not required. Assessment of stereo acuity from 600 to 15 seconds of arc.
7308001

Frisby Pocket Stereotest

A new screening test for stereopsis, suitable for patients with limited ability to understand instruction. Does not require red/green or polarised glasses.
7308003

TNO Stereotest

Viewed at 40cm. A very sensitive test for stereopsis based on random dot stereograms. The green and red spectacles worn ensure different signals are sent through each eye for fusion by the brain.
7305001 TNO Stereotest with red/green spectacles
7305010 TNO Stereotest without red/green spectacles
7305101 Red/green spectacles for TNO, adult
7305102 Red/green spectacles for TNO, children

Butterfly Stereotest

Designed to rapidly test for amblyopia and strabismus using gross through to fine stereopsis (2500 to 20 seconds of arc). Graded circle test from 400 seconds now down to 20 seconds with no monocular clues. New improved booklet has answer key on back cover and includes both adult and pediatric polarized viewers.
7306012 Butterfly Stereopsis Test with LEA Symbols®
Fly Stereotest

Designed to rapidly test for amblyopia and strabismus using gross through to fine stereopsis (4800 to 20 seconds of arc). Graded circle test from 400 seconds now down to 20 seconds with no monocular clues. New improved booklet has answer key on back cover and includes both adult and pediatric polarized viewers.

7306011 Fly Stereopsis Test with LEA Symbols

Wirt Fly Test

Consists of three stereoscopic tests employing polarised vectographs. The fly dramatically demonstrates the presence of stereo vision. The other two tests provide the practitioner with results to estimate the level of stereoscopic vision. Viewed at 40cm.

7306001 Wirt Fly Test with polarised spectacles

Randot Stereotest

Patterns or shapes are presented to the two eyes using polaroid spectacles provided. One figure stands out in space and has to be identified. Includes animal pictures viewed at 40cm.

7307001

Random Dot E Stereotest

This test consists of three cards and a pair of polarised spectacles. One card is a specimen and shows what the patient should see when using the spectacles and presented with the stereoscopic card. The third card is a blank to expose malingerers.

7307002

Polarised Glasses

Polarised glasses for use with Wirt, Random Dot and Randot tests.

7306101 Standard (black frames)
7306105 Pediatric (orange frames)
Ophthalmoscopes & Retinoscopes

Welch Allyn Ophthalmoscopes

The Welch Allyn LED bulb is guaranteed for 7 years and uses a fraction of the power of traditional bulbs, extending the on-time of your battery handle.

Update your existing PanOptic or Prestige by purchasing an LED lamp.

LED PanOptic Ophthalmoscope

The PanOptic Ophthalmoscope offers:

- Large and clear marking spots for easy blocking
- A field of view that is 5X larger than you see with standard ophthalmoscopes in an undilated eye
- A 25° field of view versus the 5° field of view of standard ophthalmoscopes
- A 26° increase in magnification – making it easier to see retinal details
- Greater working distance improves comfort for both user and patient
- Focusing wheel adjusts in a continuous, smooth action for precise control and optimum view
- Focusing range is -20 to +20 dioptres
- Halogen HPX™ lamp, provides a whiter, brighter light
- Aperture dial allows you to select micro, small and large spot sizes.
  Also includes red-free filter, slit aperture and cobalt blue filter
- Includes add-on magnifying lens for corneal exams

1717240  PanOptic Ophthalmoscope, head only – 1 1820
1717246  PanOptic Ophthalmoscope, with SMART handle, transformer and hard case –11824VSM
1717249  Welch Allyn LED bulb for PanOptic Ophthalmoscope

LED 3.5V Prestige Ophthalmoscope

Features:

- Halogen HPX™ lamp which provides 30% more light output, for true tissue colour
- 68 lenses -30 to +38 in automatic, single D steps
- Coaxial optical system for ease of entry and larger field of view
- Sealed optics keep out dust and dirt
- Cross linear polarising filter reduces abnormal corneal reflection
- Neutral filter provides the ideal amount of Halogen HPX™ light for entering healthy eyes
- Opacity setting provides the brightest Halogen HPX™ light for easy entry into eyes with cataract or other media opacity.
- 18 aperture combinations for greater versatility
- Rubber brow rest prevents scratching of glasses
- Illuminated lens dial clearly identifies dioptre setting

1717162  Prestige Ophthalmoscope, head only – 11735
1717330  Welch Allyn LED bulb for Prestige Ophthalmoscope

3.5V Coaxial Ophthalmoscope

Has all the Prestige features except the Coaxial Ophthalmoscope has 28 lenses, -25 to +40.

1717003  Coaxial Ophthalmoscope, head only –11720
Pocket Plus LED Ophthalmoscope

Combined function and style to provide maximum performance and durability in a compact design. Choose from four colours; blueberry (blue), Mulberry (Purple), Blackberry (Black) and Snowberry (White). The Posket Plu Ophthalmoscope boasts many exciting features;

- Dioptre range of -20 to +20
- Optional neutral density filters
- 7 apertures: microspot, small spot, large spot, slit aperture, fixation aperture, cobalt blue and red-free
- SureColour LED bulbs - rated for 20,000 years of use

1717465 - Blueberry
1717460 - Mulberry
1717455 - Snowberry
1717450 - Blackberry

Welch Allyn Retinoscopes

3.5V Streak/Spot Retinoscopes

Features:
- Interchangeable: streak retinoscope can be converted to a spot.
- Continuously rotating external focusing sleeve is easy to grip and manipulate regardless of hand size
- Brighter Halogen light and more efficient optics allow easier viewing of retinal reflexes
- Sealed housing keeps instrument dust-free longer
- Crossed linear polarising filter eliminates glare from trial lenses
- Magnetic fixation cards make dynamic retinoscopy easy to perform
- Converts streak to spot retinoscope by simply changing the bulb
- Rubber brow rest prevents scratching of glasses

1717300 3.5V Streak retinoscope, head only – 18200
1717044 3.5V Spot retinoscope, head only – 18300
1717170 Streak bulb – 08200
1717171 Spot bulb – 08300

Fixation Cards

Set of four retinoscopy fixation cards for Welch Allyn Retinoscopes.
1717172

Welch Allyn Diagnostic Set

Ophthalmic Diagnostic Sets contains an ophthalmoscope, retinoscope, double desk charger, smart handle & carry case

SET6  Prestige ophthalmoscope, streak retinoscope, double desk charger, 2 smart handles, LED ophthalmoscope bulb, spare retinoscope bulb & carry case
Power Supplies & Handles

3.5V SMART Power Handle

The ‘SMART’ Lithium Ion battery provides twice the on-time and is just half the weight of a rechargeable battery. Ergonomic design, made from durable CYCOLOY®. The ‘SMART’ handle has low battery and charging indicators, does not suffer from memory loss when charging and has a more environmentally friendly battery.

1717292 3.5V SMART power handle, charger and transformer – 71904
1717293 SMART power handle only – 71910
1717294 Charging pod – 71940
1717028 Transformer – 71034

Universal Double Desk Charger

Double desk charger for both SMART handles (black lithium ion) and the original double desk charger handles (NiCad).

1717296 Double desk charger, without handles – 71114
1717298 Double desk charger, with 2 SMART handles – 71734
Perimetry Accessories

Visual Field Equipment

Bjerrum Screen
For kinetic visual field testing, central and peripheral. For use at one metre. The Bjerrum screen is made of black matt material and stitched with radial lines at 15° intervals and circles at 5° intervals. Used with Traquair or similar stimuli. Supplied on corded slats or retractable into a wallbox.

5102001  Bjerrum screen, in wallbox
5102201  Bjerrum screen, on slats
5131001  Pad of 100 Bjerrum screen charts

Traquair Target
For use with the Bjerrum screen for kinetic field tests. Comprised of discs on thin stems, fitting into a sectioned wand. Protective wallet contains discs in red/green and blue/white in the following sizes: 1, 2, 3, 4, 5, 7, 10, 15, 20, 30 and 40mm.

5201001

Amsler Chart Manual

1549105  Amsler Chart Manual
1549106  Amsler recording charts, pad of 50
Slit Lamps, Tonometers & Lenses

BA 904 Portable Slit Lamp

Clement Clarke Portable Slit Lamp BA904

The BA904 Slit Lamp can be used with its head and chinrest assembly for traditional style examinations or as a hand held slit lamp.

Features include:
- Ergonomic design
- Superior optics from Haag-Streit
- Bright, halogen illumination
- Power from mains or rechargeable battery pack
- Head and chinrest with joystick
- 3 slit widths (0.12mm, 0.25 and 0.5mm)
- 4 slit heights (3mm, 5mm, 8mm and 14mm)
- Two integral colour filters; blue and yellow

5606011 Portable slit lamp, including head and chinrest stand, power centre, energy pack and large case (Set A)
5606013 Portable slit lamp, including power centre, energy pack and small case (Set C)

Applanation Tonometers

Goldmann Model AT 900M/Q Tonometer

The standard for the measurement of intraocular pressure between 0 to 78mm Hg. As the area of applanation is only 3.042mm, the scleral rigidity does not influence readings. The Model T Tonometer attaches to the footplate of the slit lamp and is removed from the slit lamp when not in use. Fits the Haag-Streit BM, BMV, BQ, BP slit lamps. (Previously T-type removable)

5811030 Goldmann Model AT900 Tonometers

The standard for the measurement of intraocular pressure between 0 to 78mm Hg. As the area of applanation is only 3.042mm, the scleral rigidity does not influence readings. The Model R Tonometer is permanently attached to the slit lamp by means of a special mounting spigot.

5810010 Goldmann Model AT 900 C/M for BM, BMV slit lamps (previously R/BM)
5812011 Goldmann Model AT 900 BQ tonometer for BP,BQ slit lamps (previously R/BQ)
5812013 Goldmann Model AT 900 C/M tonometer for BC,BD 900 slit lamps (previously R/BC)
5814001 Doubling Prism for Goldmann (black band)

Goldmann Model AT 900D Digital Tonometers

- Digital Display, Ergonomic, easy to read digital display of IOP measures even in the darkened examination room
- A true Goldmann tonometer Incorporating digital measurement technology and the Goldmann applanation principle yields, precise and reliable IOP readings.

5813010 AT900D-R (R-type for BD, BC)
5813015 AT900D-R BM (R-type for BM, BMV)
5813020 AT900D-T (T-type for BM, BP & BQ)
5813025 AT900D-BQ (R-Type for BP & BQ)
5814001 Doubling Prism for Goldmann
Perkins Mk3 Tonometer

The Perkins Mk3 hand-held applanation tonometer combines the same proven accuracy as the clinically trusted Perkins Mk2, but with an improved ergonomic design, longer lasting battery and excellent internal LED illumination.

- Ergonomic design
- Innovative LED illumination
- ‘Tonogrip’ prism holder
- Integrated rechargeable battery
- Tonosafe compatible
- Clinically trusted accuracy

5806000 - Perkins Mk3 tonometer with reusable prism
5806001 - Perkins Mk3 tonometer with 20 Tonosafe disposable prisms

Disinset V

1 plastic container for parts to be disinfected, 1 measuring jug for disinfection with a 3 part insert and cover, 1 measuring jug with funnel for rinsing and 1 glass container with insert and cover for storing disinfected parts. Disinfection solution not included.

5814017

Sterilising Stand

A simple tripod sterilising stand to take up to three doubling prisms.

5814002

Schioetz Tonometer

A simple device for the measurement of intraocular pressure.
Chrome plated complete with footplate and stainless steel plunger with jewelled hammer assembly. The device is supplied with certificates of accuracy, recording forms and protective case.

5815001 Schioetz Tonometer, inclined scale

Fluo 900 Fluorescein strips

Sterile, individually wrapped ophthalmic strips which are impregnated with fluorescein dye. Used for evaluating contact lens fitting.

7220592

Tonosafe Disposable Prisms

Tonosafe Disposable Prisms

The Tonosafe disposable prisms are a convenient and effective method of reducing the risk of cross infection between patients, eliminating the need to clean and disinfect prisms.

Tonosafe are compatible with both Goldmann and Perkins tonometers.
Boxed in 100s with five prism holders per box.

5805100 Box of 100
5805084 Black Tonosafe Prism holder
Contact, Aspheric, Laser & Indirect Lenses

Goldmann Fundus Contact Lens (901)
For binocular slit observation of the pupil, the macula, its surroundings out to 30° as well as the central vitreous body sections. Easy to use, lightweight glass provides a direct image.
5702006

Goldmann Single Mirror Gonioscopy Contact Lens (902)
For the examination of the anatomical conditions in the area of the front of the iris. 902s (scleral) lens also available. 62° mirror angle.
5702007

Original Goldmann 3 Mirror Contact Lens (903)
11mm internal diameter of the cornea part. Best in combination with Haag-Streit slit lamps. For examination of the entire fundus, the vitreous and the iridocorneal angle. Made of acrylic glass. 59 / 66 / 73 degree mirror angles.
5702009 Large (903) The classic Goldmann glass
5702010 Small 903s The classic Goldmann glass

Two Mirror Contact Lens (905)
Two mirrored surfaces, which each incline at an angle of 62° towards the front surface, have been cut into the 17mm long glass cone. This makes it possible to examine the opposite iridocorneal angle without turning the contact glass. 905s (scleral) lens also available.
5702008

Sterycup
For use with Goldmann Contact Lenses 903/903L, the Sterycup reduces the transfer of bacteria. There is no reduction in optical quality and no rotation on the patient’s cornea. Disposable and simple to use. (Box of 64).
5702091

Volk Lenses
A full range of powers for every diagnostic and therapeutic application.
For a complete list of Volk lenses, please refer to our web site at www.haagstreituk.com or our current price list.
Laser Lenses from Haag-Streit

Laser Contact Glass CGAL
A gonioscopic contact glass designed for laser treatments of the chamber angle. It reduces the laser spot by a factor of 1.5 as compared to a Goldmann Glass.
5702088

Laser Contact Glass CGIL
An iridectomy contact glass designed to perform full thickness peripheral laser iridectomies.
5702100

Laser Contact Glass CGPL
A capsulotomy contact lens designed for the dissection of opacified posterior lens capsules and membranes in the pupillary and retropupillary space with the YAG laser.
5702089

Laser Contact Glass CGVL
A vitrectomy contact glass designed for photodisruptive YAG laser procedures in the posterior vitreous.
5702098

Goldmann Three Mirror Laser Lenses
Made from acrylic with lumenised-coated protective glass. Designed to work with argon/YAG lasers. All lenses have the original mirror angles by Goldmann: 59/66/73 degrees.
5702080 Goldmann Laser Contact Glass. 903L. The Classic Goldmann Lens.

Cleaning & Disinfecting

Disinset V
Comprises: 1 plastic container for parts to be disinfected, 1 measuring jug for disinfection with a 3-part insert and cover, 1 measuring jug for rinsing and funnel and 1 glass container with insert and cover for storing disinfected parts. Disinfection solution not included.
5814017

Volk Cleaning Cloths
Volk precision optical lens cleaner consists of a highly absorbent, lint-free optical towellite moistened to an exact saturation level, with a unique combination of oil removers and cleaning agents. Ideal for use on Volk lenses, microscope eyepieces, cameras and other precision optical surfaces. (Box of 24).
1549900
Orthoptic Equipment

Synoptophores

Clement Clarke Synoptophores has established a reputation second to none in the world of orthoptics and binocular vision. Over 70 years of experience in the manufacture and use of these fine instruments have resulted in continuous development and advancement in performance and reliability.

Synoptophore Model 2001

The most comprehensive model in the range, for all standard measurements and treatments: angle alpha (kappa), objective angle, abnormal retinal correspondence, cyclo and vertical phorias and both horizontal and vertical vergences. The flashing unit stimulates eyes simultaneously or alternately and manual flashing and dimming rheostats are standard controls. High intensity halogen light provides after images. Removable Haidinger brush motor units in the 2001 model permit pleoptic assessment and treatment for eccentric fixation and ARC.

Synoptophore Model 2002

This model combines all the features of Model 2001 with the exception of the Haidinger’s Brushes device. It is the standard instrument for the busy clinic and ideal for the assessment and treatment of patients needing orthoptic care or management.

Synoptophore Model 2003

The basic model Synoptophore provides all the standard measurements and treatments including assessment of the angle alpha, the objective angle, abnormal retina correspondence, cyclophoria, hyperphoria and horizontal vertical vergences. Manual flashing switches and independent dimming rheostats are provided as standard.

Synoptophore Slides

• Series A, Maddox test
• Series D, stereoscopic vision
• Series F, fusion
• Series G, simultaneous perception
• Series H, simultaneous perception
• Mayou series of eight slides
• Series S, special purpose slides

Synoptophore Slide Sets

6411002 Set of twelve pairs for Model 2002/3 (D5/6, D51/52, D61/62, D71/72, F31/32, F71/72, F81/82, F177/178, G15/16, G47/48, G55/56, G65/66)
6413002 Set of eight Mayou slides
6414005 Set of Braddick Random Dot graded stereo slides

For a full list of Synoptophore slides, please refer to the HS-UK Synoptophore Slide Catalogue, available at www.haagstreituk.com/synoptophore
General Orthoptic

Children’s Fixation Bar

An ideal orthoptic aid specifically designed to aid children’s fixation during the prism and cover test and other orthoptic assessments. It has attractive coloured objects on one side and two reduced test types and a passage of N5 reading type on the reverse.

7004001  Original Budgie/policeman fixation stick
7004002  Pirate/Dog fixation stick
7004003  Fish/Dog fixation stick
7004004  Fairy/Cat fixation stick

Lang Fixation Bar

A white bar with brightly coloured pictures of varying sizes on one side and a near vision test on the reverse. Designed primarily to attract and hold attention during examinations.

7004011

Kay Fixation Stick

These colourful sticks are ideal for keeping a child’s attention during cover tests. Each stick contains pictures and letters.

4116120  single fixation stick
4116121  pack of 3

Lang Fixation Cube

Cube mounted on holder with brightly coloured pictures on five faces of the cube. Designed to attract attention during examination.

7004010  Lang cube no.1 (white handle)
7004012  Lang cube no.2 (red handle)

Bagolini Lorgnette

Similar to the Bagolini striated lenses but is presented in a convenient lorgnette format.

7207005

Franceschetti Maddox Rod

The large diameter combined with a long handle facilitates examination of muscle balance. Twirling in the same manner as the cross allows the horizontal and vertical phorias to be checked in quick succession.

4365001
Maddox Wing Test
A convenient hand-held, quick and efficient near test for heterophoria. Esophoria and exophoria are measured by the horizontal scale. Hyperphoria is measured on the red vertical scale. Cyclophoria may be assessed by moving the red arrow pointer parallel to the horizontal scale. Each eye piece has cell spaces to accommodate the patient’s near prescription if required.
7005001

RAF Binocular Gauge
For determining the objective and subjective convergence points. The mask eye and measuring accommodation. Consists of a light weight bar, 500mm in length, on which a sliding four-sided drum is mounted, with different tests on each panel.
7006001

Maddox Phoria Measure
A quick and cost-effective way of measuring Phoria imbalances. a combination of a Maddox Multiple Rod coincident with a rotatable prism. Can be used horizontally and vertically with either eye to detect the presence of Heterophoria. The orientation is clearly indicated by the printed arrows on the handle.
7005050

Bagolini Red Filter Bar
This The Bagolini Filter Bar is used to investigate the depth of suppression in patients with amblyopia up to the age of 7 years. This instrument consists of a series of red filters of increasing density from very pale to very dark. This decreases the illumination in front of the fixating eye to induce fixation with the deviating eye and therefore diplopia.
1549223

Neutral Density Filter Bar
This bar is an assembly of optical filters of progressive densities providing a graduated system of dissociation. Very useful to reinforce weak fusional status. A holding handle is integral. Neutral Density Bars are used to measure Afferent Pupillary Defects (APD) also termed ‘diminished pupil reaction to light levels’. The log units quantify how much light is transmitted as 41%, 22%, 12% 7%, 5% and 3%. Supplied in wallet.
1549150

Thumb Bar Readers
Used for exercising binocular vision at home or school. It is held against the centre of the page of reading material. Sold in packs of 10. Red.
7313010

Near Point Dot Card
Card to measure the near point of convergence and for home exercises. Range is from 6cm to 24cm.
4116110 pack of 50
Stereograms

These are printed on thin card and are suitable to give to patients for home training purposes. Fusion and stereoscopic.

- 7309001 Cat
- 7309002 Open bucket
- 7309003 Closed bucket
- 7309005 1-2-3
- 7309006 Mayou graduated stereograms

Prisms

Prism Bars

Suitable for assessing both distance and near angle of deviation by the prism and cover test. The bars may also be used for the measurement of fusional reserves and vergence exercises. Both horizontal and vertical bars contain 16 prisms mounted between two aluminium channels which help to prevent the surfaces becoming scratched. Optically polished to very close tolerances, the surfaces have excellent distortion-free viewing.

Power range as follows:
Horizontal: 1, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 25, 30, 35, 40, 45Δ
Vertical: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 14, 16, 18, 20Δ

- 7108001 Pair of horizontal and vertical prism bars with loose 20Δ prism, in case
- 7108101 Horizontal prism bar with loose 20Δ, in wallet
- 7108201 Vertical prism bar in sheath

Solid Prism Bars

Similar to the above prism bars but manufactured in a solid, one piece, bar of plastic.

Power range as follows:
Horizontal: 1, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 25, 30, 35, 40Δ, plus an additional 45Δ prism
Vertical: 1, 2, 3, 4, 5, 6, 8, 10, 12, 14, 16, 18, 20, 25Δ, plus an additional 30Δ loose prism. Available as individual bars or as a pair in a case.

- 1561380 Pair of horizontal and vertical solid prism bars

Plastic Prisms

Universal or square plastic prisms are useful for a number of orthoptic and ophthalmic test procedures. Available in various set sizes and as single plastic prisms.

Fresnel Prisms

Consist of very thin plastic membranes measuring only 1mm thick utilising the Fresnel principle of tiny lens and prism segments. May be cut to fit most frame sizes and shapes and are simply attached to the existing spectacle lenses. The membranes can be cut into small segments when bi-focal lenses are affected. Light weight and cosmetically superior to glass especially when high powers are required. Available in a range of powers;

- Prism powers:
  1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 15, 20, 25, 30, 35, 40Δ
Bangerter Occlusion Foils

A system of graded foils to equalise the spatial contrast of the dominant to that of the amblyopic eye.

7103990 1.0 Bangerter Graded Occlusion Foil (visual acuity ~6/6 or 20/20)
7103991 0.8 Bangerter Graded Occlusion Foil (visual acuity ~6/7.5 or 20/25)
7103992 0.6 Bangerter Graded Occlusion Foil (visual acuity ~6/9 or 20/30)
7103993 0.4 Bangerter Graded Occlusion Foil (visual acuity ~6/15 or 20/50)
7103994 0.3 Bangerter Graded Occlusion Foil (visual acuity ~6/21 or 20/70)
7103995 0.2 Bangerter Graded Occlusion Foil (visual acuity ~6/30 or 20/100)
7103996 0.1 Bangerter Graded Occlusion Foil (visual acuity ~6/60 or 20/200)
7103997 <0.1 Bangerter Graded Occlusion Foil (visual acuity <6/90 or 20/300)
7103998 Light Perception Bangerter Foil
7103999 00 Bangerter Foil
7103989 Bangerter Foil bar
General Equipment

Torches

Professional Penlite

For quick and effective evaluation of the pupillary reflex. Robust, attractive penlight with matte black finish using high intensity halogen light for true tissue colour rendition and long lasting consistent illumination. Durable solid brass construction. Uses 2 x AA batteries. 1717158

Reusable Pentorch

Black pen torch for corneal reflections, pupil assessment and extra-ocular motility testing. Use 2 x AA batteries (included). Operates by twisting body of torch. 1424001

Disposable Pen Torch

Uses 2 x AA batteries (included). Operates by pressing clip to contact. 7614050  Disposable Pen Torch, pack of 6

Loupes

Plastic Headband Loupe

A simple, lightweight loupe. The comfortable, continuous headband is fully adjustable to fit any size. Adjustable pivot knobs hold visor in any position for easy flip-up viewing. Provides magnification of x2.5. 6104001

Alger Brush

Alger Brush Mk II

A gentle yet highly effective corneal rust ring remover. Runs off 1 x AA battery, no switches, simply spin mandrel to operate. 6301001  Alger brush, 1mm burr  6301003  Alger Brush, 1/2mm burr  6301002  Replacement burr, 1mm burr  6301004  Replacement burr, 1/2mm burr

Contact Lens Accessories

Schirmer Tear Test

Useful for determining total lachrymal secretion and provides useful information prior to the fitting of contact lenses. There are 50 pairs of individually sterile tests in each box. 4701001
