Choose from a selection of our best-selling products

HS-UK is one of the UK’s leading manufacturers and distributors of medical devices to the orthoptic, optometry and ophthalmic sectors. We design and manufacture our own gold-standard devices such as the; Synoptophore, BA904 portable slit lamp, Perkins Mk3 tonometer and Tonosafe disposable tonometer prisms.

We are proud of our comprehensive product portfolio, which includes; prisms, lenses, vision tests, fixation bars/cubes, occluders, retinoscopes and ophthalmoscopes. We have distributorships with key brands such as; Welch Allyn, Fresnel, Kay Pictures and Volk.

A selection of our best-selling products can be found in this catalogue, including everything from a small budgie stick, to World-leading Tonosafe disposable prisms, to the gold-standard Perkins Mk3 hand-held tonometer.

To order, please call our sales hotline on (01279) 883841 or visit our e-shop at www.haagstreituk.com/eshop.
Eustace Pinhole Occluder
A lorgnette style occluder with five pinholes in one eye-piece. Also incorporates pupillary distance rule and fixation point.

SKU 4364001

Romanes Occluder
The Romanes Occluder is a useful accessory for the trial case. It is used for the assessment of visual acuity and the cover test.

SKU 4363001

Opaque Occluder
An opaque occluder with handle for cover testing. Being opaque, eye movements of the occluded eye can be monitored during the test.

SKU 1561010

Occluding Spectacles (Junior)
The junior glasses have a hinged flip-up occluder to test each eye without changing glasses.

SKU 4116143

Occluding Spectacles
Brightly-coloured regular occluding glasses for testing unioocular vision. Comprise of two pairs of glasses in a set for right and left vision testing.

SKU 4116134

Black/Green Silk Eye Patch
A simple, washable, durable eye patch with elasticated band. For use wherever patching may be required.

SKU 1710005

Order online: www.haagstreituk.com/eshop or call the Sales Hotline: (01279) 883841
Fixation Bars

Budgie/Policeman orthoptic aid designed for children’s fixation during the prism and cover test.
Other fixation bars are available, contact (01279) 883841 for more information.

SKU 7004001

Lang Cubes (Red)

Fixation cube with five colourful pictures, each turn of the cube shows a new object. Features horse, tea, cup, duck, star and teddy bear.
White cube also available, contact (01279) 883841 for more information.

SKU 7004012

Lang Fixation Bar

The Lang fixation bar contains brightly coloured pictures of the varying sizes on one side and a near vision test on the reverse. Designed to attract and hold fixation during examinations.

SKU 7004011

Kay Picture Sticks (Set A)

Ideal for keeping a child’s attention during cover-test. Each stick (sets of 3) contains 4 pictures plus letters.
Other Kay Picture Sticks are available, contact (01279) 883841 for more information.

SKU 4116111

Reusable Pen Torch

Black pen torch for corneal reflections, pupil assessment and extra-ocular motility testing. Uses 2 x AA batteries (included).

SKU 1424001

Disposable Pen Torch

Pack of 6 disposable pen torches. Operates by pressing clip to contact.

SKU 7614050
» Tonosafe; the World-leading method of reducing the risk of cross-infection. «

Single patient use
Tonosafe prisms are supplied fully-sterilised and are disposed of after each patient use. Unlike non-disposable prisms, there is no need for time-consuming (and potentially damaging) disinfection and sterilisation.

Quick & accurate
Quick and easy-to-use, it only takes a moment to position the prism, and the optical clarity provides a superb view of the fluorescent semi-circles.

Goldmann standards
Calibrated to Goldmann standards, Tonosafe has been specifically designed for use with Goldmann and Perkins-style tonometers. the retina when using a non-contact lens.

(01279) 883829 | tonosafe@haag-streit-uk.com | www.haagstreituk.com/tonosafe
Jaeger Reading Test

A near vision booklet, viewed at 35cm, with text from J1 to J20.

SKU 1549104

Maclure Reading Test

An ideal test for young children, which is designed to differentiate between their ability to see and read. The test is based on the Ladybird keywords reading scheme. Text range N5 to N48.

SKU 4118001

Curpax Test Type

Text is provided with the range N5 to N48 with a reduced Snellen test type, an industrial test, a stock market report, a telephone directory, a sheet music extract and a numeral test.

SKU 4117051

Laminated Test Type

Dual-sided laminated test type. N4 to N48 range with modern text and computer screen presentation.

SKU 1646011

Crowded Kay Pictures

Kay pictures 3 metre Crowded LogMAR book set. Combines the accuracy of crowded LogMAR acuity testing with the ease of naming pictures. It is suitable to test children’s vision from about 36 months of age.

SKU 4116113

Illiterate E

Plastic visual acuity test panels, (wall hanging). For use at 6 meters.

SKU 4115013
**Sheridan Gardiner Comprehensive Set**

Standard Sheridan Gardiner flip-over set (one letter per page) to be used at 6 metres. Includes key card.

SKU 1549011

---

**Cambridge Crowding**

Pre-school visual acuity testing. This test is sensitive to the crowding effect which may impair vision when acuity for single letters is normal. Very simple to understand.

SKU 4116020

---

**Kay Letter Test**

Crowded LogMAR (flip-over) booklet for testing near and distance visual acuity. Letters are presented in a crowding box, four to row. Sizes 1.0 to -0.1) (3/30 to 3/2.4).

SKU 4116144

---

**Crowded LogMAR**

LogMAR Crowded (flip-over) booklet. Ideal for testing children from 3 years of age. 4 letters at each acuity level from 6/3 to 6/38.

SKU 4302014

---

**Sonksen LogMAR Test**

The Sonksen LogMAR Test is a visual acuity test. A unique feature of the test is that it is published with centile charts of acuity (similar to those used for growth) from 2 years 9 months, to 7 years 9 months - a period of very rapid changes in acuity.

SKU 1549188

---

**LogMAR Chart**

For 3 metre viewing. The arrangement of the letters on these revised charts is balanced so that the Sloan letters are represented at least once in every position. Can be used in an illuminated cabinet or as a wall hanging chart.

SKU 4302007

---

Order online: www.haagstreituk.com/eshop or call the Sales Hotline: (01279) 883841
**Vocational Near Vision Test Type**
Contains reading material familiar to patient’s everyday life, including music, street map and football league table. Text range from N4.5 up to N48.

SKU 4117001

---

**Cardboard Folding Test Type (TOY, dual purpose)**
6 metre, wall-hanging folding test type. Hard, durable visual acuity test types useful for domiciliary use. Other chart options are available, contact (01279) 883841 for more information.

SKU 1646702

---

**Plastic Hanging Test Type**
AOE plastic visual acuity test panel, for wall hanging. 17 chart options available including direct and indirect. END charts include 6/7.5 acuity. Contact (01279) 883841 for more information.

SKU 4115007

---

**Childs Colour Test Alpha**
A confusion test with pictures to indicate the presence of inherited colour vision defects.

SKU 4129100

---

**City University Colour Test**
A quick colour vision screening book. Each page contains four coloured circles and a central spot, the patient must closely match the central spot on one of the surrounding circles.

SKU 1549101

---

**Ishihara Colour Test (38 Plate)**
This colour vision test presents a different design consisting of numerals and winding lines formed by coloured dots on a background of coloured dots. Other colour tests also available, contact (01279) 883841 for more information.

SKU 4129001
**Oculus Child Half Eye Trial Frame**
Children drop cell type trial frame with space for 6, 38mm trial lenses. PD range 59-67mm. Made of plastic and light metal.

SKU 4506035

**Halberg Trial Clips**
Useful and effective monocular trial frame which may be used with almost all types of spectacle frames. Incorporates three cells for 38mm trial lenses and accessories. Ideal for low vision testing.

SKU 1549050

**Oculus UB3 Universal Trial Frame**
Space for 10, 38mm trial lenses. PD range 48-80mm. Has adjustable angle and length of the side, adjustable vertical angle and height of the nosepiece, axis adjustment, Vertex distance scale.

SKU 4505001

**Oculus UB4 Trial Frame**
Space for 10, 38mm trial lenses. PD range 46-82mm. Has adjustable angle and length of the side, adjustable vertical angle and height of the nosepiece, axis adjustment, Vertex distance scale.

SKU 4505100

**Reduced Aperture Trial Lens Set**
38mm trial lens set. 218 reduced aperture lenses plus 7 accessories in wooden case.

SKU 4304001

**Full Aperture Trial Lens Set**
Standard trial case with full aperture lenses. 169 lenses plus 9 accessories, complete in wooden case.

SKU 4302300

Order online: www.haagstreituk.com/eshop or call the Sales Hotline: (01279) 883841
**Retinoscopy Racks**

Ultra light-weight moulded lens racks made from high grade optical quality plastic. Sphere lens power range, ±0.5, 1, 1.5, 2, 2.5, 3, 3.5, 4, 5, 6, 7, 8, 9, 10, 12, 15 dioptres. To avoid scratching, lenses are deeply embedded in the frame and supplied in a soft plastic case.

SKU 1561030

**Cross Cylinder (0.25D)**

0.25D full aperture cross cylinder, etched with red and white to indicate convex and concave cylinder axis.

Other cross cylinders also available in 0.50D, 0.75D, 1.00D dioptre as 2 lens, 3 lens and 4 lens. Contact (01279) 883841 for more information.

SKU 4361002

**Confirmation Test (±0.25D)**

±0.25D glass lenses mounted in a metal frame.

Also available in the following powers; 0.50, 0.75 and 1.00 dioptre as 2 lens, 3 lens and 4 lens. Contact (01279) 883841 for more information.

SKU 6221020

**Welch Allyn Dynamic Retinoscopy Cards**

Set of four retinoscopy fixation cards for Welch Allyn Retinoscopes.

SKU 1717172

**Welch Allyn Professional Pen Light**

For a quick and effective evaluation of the pupillary reflex. This robust penlight uses high intensity halogen light for true tissue colour rendition and long lasting consistent illumination. Batteries included.

SKU 1717158

**Blueberry Pocket Plus LED Ophthalmoscope**

Boasts a dioptre range of -20 to +20, 7 apertures and an LED bulb, rated for 20,000 hours of use. Includes soft case.

Also available in blackberry, mulberry and snowberry. Contact (01279) 883841 for more information.

Welch Allyn Streak Retinoscope
Makes refractions easier than ever by producing one of the brightest, sharpest and cleanest streaks available.
Spot retinoscope also available, contact (01279) 883841 for more information.
SKU 1717300

Welch Allyn Double Desk Charger
Double chargers for Welch Allyn Lithium Ion retinoscope and ophthalmoscope handles.
SKU 1717296

Welch Allyn Lithion Ion Smart Handle
Half the weight of traditional 3.5V handles. Fits all Welch Allyn 3.5V instruments heads. 120 minutes of on-time (compared to 60 minutes for standard NiCad handles).
SKU 1717293

Welch Allyn Single Desk Charger
Single chargers for Welch Allyn Lithium Ion retinoscope and ophthalmoscope handles.
SKU 1717294

Welch Allyn 3.5V Recharging Transformer
For use with Welch Allyn single desk charger.
SKU 1717028

Insight Binocular Indirect Ophthalmoscope (BIO)
BIO with lightweight design, (under 500g), uses white LED technology, optimised within the colour spectrum for enhanced patient comfort.
10-year warranty included.
SKU 1717173
**Volk 90D Lens**
90 dioptre - 21mm Volk lens, in case. Field of view 74/89°, 0.76 x magnification, 7mm viewing distance.

**Volk 78D Lens**
78 dioptre - 31mm Volk lens, in case. Field of view 81/97°, 0.93 x magnification, 8mm viewing distance.

**Volk 60D Lens**
60 dioptre - 31mm Volk lens, in case. Field of view 68/81°, 1.15 x magnification, 13mm viewing distance.

**SKU 1549120**

**Volk Digital High Mag Lens**
Field of view 57°/70°, 1.3 x magnification, 30mm viewing distance. Enables high magnification imaging of the central retina.

**Volk Superfield Lens**
Field of view 95/116°, 0.76 x magnification, 7mm viewing distance. Enables detailed 3D retinal viewing.

**SKU 1549857**

**3 Mirror Haag-Streit Contact Lens**
The classic Goldmann contact lens, for examination of the entire ocular fundus and the iridocorneal angle (classic 903 large).

**SKU 1549902**

**SKU 1549905**

**SKU 1549948**

**SKU 5702009**

Order online: www.haagstreituk.com/eshop or call the Sales Hotline: (01279) 883841
Tonosafe Disposable Tonometer Prisms
The Tonosafe disposable prism is a convenient and effective method of reducing the risk of cross infection between patients, eliminating the need to clean and disinfect prisms. Boxed in 100s with five prism holders per box.
SKU 5805100

Perkins Mk3 Tonometer
The Perkins Mk3 hand-held applanation tonometer combines accuracy with an improved ergonomic design, longer-lasting battery and excellent internal LED illumination. Includes tray of 20 Tonosafe.
SKU 5806001A

Haag-Streit Reusable Prism
Resusable Haag-Streit applanation tonometry prism for use with Haag-Streit Goldmann tonometers and Clement Clarke Perkins tonometers. Supplied non-sterile.
SKU 5814001

Tonometer Guideplate
This tonometer guideplate is especially designed to mount the T-type tonometer on various slit lamp models. Tonometry is possible from the left or right eye piece.
SKU 5811020

Control Weight for Goldmann Tonometer
The check weight is to be used as part of a monthly control procedure. Five circles are engraved on the weight bar. The middle one corresponds to drum position 0, the two immediately to the left and right to position 2 and the outer ones to position 6.
SKU 5814013

Fluo 900 Fluorescein Strips
Sterile, individually wrapped ophthalmic strip which are impregnated with fluorescein dye. Used for evaluating contact lens fitting.
SKU 7220592
**Bagolini Glasses**
Bagolini striated lenses presented in a convenient lorgnette. Lenses aligned at 45 and 135 degrees. Useful for assessing sensory fusion.

**SKU 7207005**

**Red Filter Bar**
The Bagolini filter bar is used to investigate the depth of suppression in patients with amblyopia up to the age of 7 years. This instrument consists of a series of red filters of increasing density from very pale to very dark.

**SKU 1549223**

**Maddox Rod**
Facilitates examination of extra-ocular muscle imbalance. Twirling in the same fashion as a cross-cylinder allows horizontal and vertical phoria to be checked in quick succession.

**SKU 4365001**

**Maddox Phoria Measure**
A quick and cost-effective way of measuring Phoria imbalances. A combination of a Maddox Multiple Rod coincident with a rotatable prism. Can be used horizontally and vertically with either eye to detect the presence of Heterophoria.

**SKU 7005050**

**CCO Prism Bars**
Suitable for assessing both distance and near angle of deviation by the prism and cover test. The bars may also be used for measurement of fusional reserves and vergence exercises. Optically polished to very close tolerances.

**SKU 7108001**

**Prism Bars**
Suitable for assessing both distance and near angle of deviation by the prism and cover test. The bars may also be used for the measurement of fusional reserves and vergence exercises.

**SKU 1561380**

Order online: www.haagstreituk.com/eshop or call the Sales Hotline: (01279) 883841
**Loose Prisms**
Universal square plastic 20D prism, useful for a number of Orthoptic and Ophthalmic test procedures.
Available as single prisms or in various set sizes. Contact (01279) 883841 for more information.
SKU 1561359

**Loose Prism Set (16)**
Universal or square plastic prisms, useful for a number of orthoptic and ophthalmic test procedures. Set of 16 prisms.
Available in various set sizes and as single plastic prisms, contact (01279) 883841 for more information.
SKU 7101003

**Fresnel Prism (1D)**
Fresnel prisms can be cut to fit spectacle lenses and are designed to treat double vision or diagnose extra ocular muscle disorders.
Other Fresnel Prisms are available, contact (01279) 883841 for more information.
SKU 7105002

**MASK-it Disposable Eye Patches**
MASK-it is the only disposable eye patch available for perimetric testing. It provides fast and effective occlusion and eliminates the need for cleaning of reusable patches.
Available in boxes of 500.
SKU 7220533

**Bangarter Foil**
A system of graded foils of varying opacities. Designed to equalise spatial contrast of the dominant eye to that of the amblyopic eye. 1.0 opacity.
Other Bangarter foils are available, contact (01279) 883841 for more information.
SKU 7103990

**Opticlude Eye Patches**
Breathable, hypoallergenic, latex free, adhesive junior eye patch to be used whenever occlusion therapy is required. Easy to apply. (pack of 20).
Adult sizes also available. Contact (01279) 883841 for more information.
SKU 1771010
PERKINS MK3 TONOMETER
The ‘gold-standard’ in hand-held tonometry

Accurate
Goldmann-compatible, the Perkins Mk3 hand-held applanation tonometer provides the same proven accuracy as other clinically-trusted Haag-Streit manufactured tonometers.

Portable
The Perkins Mk3 is comfortable to hold, well-balanced and designed specifically to examine patients difficult to assess by traditional applanation tonometry methods, e.g. bed-ridden or paediatric.

Powerful LED illumination
The innovative built-in LED illumination produces an enhanced image of the tonometer mires, permitting use regardless of ambient lighting conditions.

(01279) 883829 | perkins@haag-streit-uk.com | www.haagstreituk.com/perkins
Frisby Stereotest

The stereotest consists of three plates which permit stereoscopic acuity measurements in the range of 600-20 seconds of arc. Each plate has four random texture patterns, with a hidden circular shape in one. Suitable for a wide age range.

SKU 7308001

Frisby Screening Test

This ingenious free-space stereotest consists of three plates which permit stereoscopic acuity measurements in the range of 600-20 seconds of arc. Each of the three plates has four random texture patterns, with a hidden circular shape in one.

SKU 7308005

Frisby Screening Plate

A new screening test for stereopsis, suitable for patients with limited ability to understand instructions. Does not require red/green or polarised glasses.

SKU 7308003

Lang I Stereotest

The Lang I stereotest is an easy-to-use screening test designed for early detection of problems with stereoscopic vision in children. The Lang I displays a star, a cat and a car.

SKU 7307020

Lang II Stereotest

The Lang II stereotest is an easy-to-use screening test designed for early detection of problems with stereoscopic vision in children. The Lang II displays a moon, a truck and an elephant, as well as a star that can be seen with only one eye.

SKU 7307025

Polarised Spectacles

Polarised glasses for use with Wirt Fly, Random Dot and Randot tests.

SKU 7306101
» The most comprehensive binocular vision assessment available today. «

SYNOPTOPHORE
Versatile, accurate & easy-to-use

THE instrument of choice
The Synoptophore is ideal for the assessment and treatment of ocular motility disorders. It can easily perform accurate measurements in all 9 positions of gaze.

Comprehensive measurements
Measurements and treatments include the assessment of; the objective and subjective angle of deviation, abnormal retinal correspondance (ARC), cyclophoria, hyperphoria and vergences.

3 different models
All of the Synoptophore models allow standard measurements and treatments. They enable the assessment of; simultaneous perception, fusional amplitudes and gross stereopsis.

(01279) 883829 | synoptophore@haag-streit-uk.com | www.haagstreituk.com/synoptophore
Recognised as the standard for stereo depth perception testing, the Wirt Fly Stereotest allows for easy administration and evaluation of both gross and fine stereo vision.

**Wirt Fly Stereotest**

SKU 7306001

The Randot tests and evaluates stereo depth perception by requiring patients to identify six geometric forms from random dot backgrounds (500 to 20 seconds of arc).

**Randot Stereotest**

SKU 7307001

TNO stereotest contains seven red/green test plates, presented in book form. In conjunction with red/green spectacles, the first 3 plates are used for screening, whilst the quantitative plates (V - VII) enable stereoacuity between 480 and 15 seconds of arc.

**TNO Stereotest**

SKU 7305001

Designed to rapidly test for amblyopia and strabismus in non-readers and non-verbal children and adults. New improved booklet, with answer key on the back cover and polarising glasses.

**Butterfly Stereotest**

SKU 7306012

Designed to rapidly test for amblyopia and strabismus in non-readers and non-verbal children and adults. New improved booklet, with answer key on the back cover and polarising glasses.

**Random Dot Stereotest**

SKU 7306013

Designed to rapidly test for strabismus in non-readers and non-verbal children and adults. New improved booklet, with answer key on back cover and polarising glasses.

**Fly Stereotest**

SKU 7306011
**Maddox WIng**

A convenient hand-held, quick and efficient near test for heterophoria. Esophoria and exophoria are measured by the horizontal scale. Hyperphoria is measured on the red vertical scale.

SKU 7005001

---

**RAF Gauge**

For determining the objective and subjective convergence points, examining the accommodation and determining the dominant eye.

SKU 7006001

---

**Near Point Dot Card**

Near point convergence card (pack of 50). To measure the near point of convergence and for home exercises. 6cm to 24cm.

SKU 4116110

---

**Stereogram Cards**

Stereogram Cards are ideal for home training. Designed to compensate for latent convergence, divergence, or convergence insufficiency.

For other Stereogram cards, contact (01279) 883841.

SKU 7309001

---

**Goldmann Perimeter Charts**

Pad of 100 paper charts for recording kinetic perimetry, used in conjunction with the Haag-Streit Goldmann 940 Perimeter.

SKU 5008002

---

**Amsler Chart Manual**

SKU 1549105

---

Order online: www.haagstreituk.com/eshop or call the Sales Hotline: (01279) 883841
**Luedde Exophthalmometer**

A clear perspex bar about 1cm square x 10cm long. Shaped with a notch at one end and graduated in cm and mm for measurement of eye protrusion.

SKU 1561320

---

**Hertel Exophthalmometer**

These superior and inferior orbital rim-based instruments measure the position of the globe accurately even after lateral orbitotomy, e.g. post tumour removal or thyroid decompression. Easy-to-use, fast reproducible results and comfortable for the patient.

SKU 1605020

---

**Naugle Mirror Exophthalmometer**

Mirror exophthalmometer used to accurately measure the position of the globe based on superior and inferior orbital rim measurements.

SKU 1605025

---

**Schirmer Tear Test**

Useful for determining total lachrymal secretion and provides useful information prior to the fitting of contact lenses. There are 50 pairs of individually sterile tests in each box.

SKU 4701001

---

**Chinrest Papers**

Pack on chinrest papers for Haag-Streit Slit Lamps. Size 5 1/4” x 1 1/2” (pack of 500).

SKU 5702021

---

**Haag-Streit Slit Lamp Bulb**

The recommended replacement bulb for Haag-Streit BM, BP, BQ and BX 900 slit lamps. 6v, 4.5a, pre-centred base. Manufactured by Haag-Streit.

SKU 5703001
